Industrial grade table-mountable extender

S-Table-III

This product is a desktop hidden network/optical transmission equipment. It is equipped with a traditional table plug connection network, USB, power interface, while using advanced audio and video transmission technology to transmit audio and video signals through a single network cable or fiber optic cable for long distance transmission, providing users with a set of advanced and beautiful Desktop signal connection solution. Plug and Play. Supports picture quality and color depth adjustment. Supports 20-level zoom ratio adjustment. A variety of interface options are available for customers with special needs.

Features

◎ Suppports HDMI/VGA/AUDIO signal input/output

◎ Supports POC power supply

◎ Supports output resolution adjustment by dialing

◎ Industrial design, can support 7*24 long-term stable work

◎ Supports multiple color spaces RGB444, YUV444, YUV422, x.v.Color extends the color gamut

◎ Supports 1080P@60Hz; 1080i@60Hz; 720P@60Hz HDTV format resolution HD signals, can also support 1920 * 1200 and other VESA format resolution HD signal, the maximum bandwidth of 10.2Gbps

◎ Long distance transmission

1. configure the HDBaseT module, can transmit audio and video signals 70 meters

2. configure H.264 module, with network transmission,card based matrix, distributed Network matrix realizes long-distance transmission of signal network

3. configure the fiber module can transmit audio and video signals up to 2 km
